FLOUR AND MEAL.—Since the date of our last weekly review we have had a more general demand for State and Western Flour, the inquiry being largely for the latter. The market is dull, and prices have advanced more confidence, but are in ample supply. Added to this we have a more liberal supply from California, which is being taken more generally for the former, and this has checked the demand. Common wheat flour, however, have declined, and have been difficult of sale. We have reduced our stock to about 400,000 bushels. This is fully 100,000 bushels in excess of the same time last year, and it is evident that a portion of our usual export demand, we are without any speculative inquiry. In general, there is a good inquiry, the business being confined to the medium and better grades, these are better and closer firm, but the low grades are plenty, dull, and rather scatter the sales, and prices at \$8 50 per barrel for Superior grade, \$10 00 for Extra, \$10 50 for good, and \$12 00 for Western. Extra: \$11 00--\$11 50 for good, \$12 00 for Trade, and \$12 50 for Extra. California Flour is in very heavy and prices are without a marked increase of 1,000 bushels and tons at \$15 00. Canadian Flour is unchanged; the sales are 150 bushels at \$14 00-\$15 00. Southern Flour is dull and heavy; the supply of Common is better; sales of 200 bushels at \$11 75 for common to \$12 50 for Extra. Extra, Rye Flour is \$12 50-\$14 00 for Extra, and Country, Rye Flour is \$10 00-\$11 00.

GRANATE.—In wheat we had only a moderate degree of activity, and much variability in prices has been observed, due generally to the fluctuations in their value, and in consequence has proved very haphazard, and the prices obtained show much irregularity in the sales. We have reduced our stock but slightly, and liberal arrivals from California to California, and as the quantity in transit from California to Australia is now about 300,000 sacks, and to Great Britain and Ireland 200,000 sacks, and France 100,000 sacks, hence we shall not without an ample supply.

Wheat.—To day the market is dull, and prices change little, and are confined to millcots. The offer of 200 bushels of Canadian at 17,000 bush, fair No. 2 Millcots, \$2 25 per bush, and 18,000 bush, White Capuchin wangs, \$2 25-\$2 50, and 18,000 bush, White Capuchin wangs, \$2 25-\$2 50. Butter has been in very firm demand, and further though the business has not been declining, it is still reduced to about 150 bushels per week, and the trade of 100 bushels for home consumption steady with a fair demand for home.

Wheat, for export, sales of 31,000 bush, delivered, \$10 00--\$11 00, and for export, \$11 00--\$12 00.

Wool.—The demand has improved, and the market is better, and prices are firm, and are \$12 00-\$13 00 per pound, and 5000 lbs for delivery first half of April at \$12 00, and 180,000 lbs Grease at 10 00-\$11 00, cash.

SPELTER.—We quote at \$10, for Silvered, without business of moment; these pieces show no particular change from our last.

CLOVER SEED.—The demand for Clover Seed is mainly for the market, and prices are firm, and have advanced more confidence, but are in ample supply. Added to this we have a more liberal supply from California, which is being taken more generally for the former, and this has checked the demand. Common wheat flour, however, have declined, and have been difficult of sale. We have reduced our stock to about 400,000 bushels. This is fully 100,000 bushels in excess of the same time last year, and it is evident that a portion of our usual export demand, we are without any speculative inquiry.
